

## Training schedule - Round 1500

Document Number: IR1500\_01.4  
Release: 1.1, 06.06.2022

### General info

We are searching for 1500 students to be trained between July 2022 and December 2022. They should pass their international exam by the end of January 2023 and speedup their professional development.

### Schedule of classes - dates and hours

Below are listed class dates and hours of lectures as of 06.06.2022.

As this project involves a lot of people for long duration, changes are inevitable. If need for change happen, we will try to have the same daily hours if possible and starting day to be as close as possible to initial plan.

Note:

Most classes will require you to dedicate extra time for post class review and home assignments. As a rule, you must spend at least 2 to 3 times the class hours for homework and material review. For example, if course **C++ Certified Associate Programmer** has 40 class hours, you need to spend from 80 to 120 hours doing homework and reviewing the materials to prepare for the exam. The time for study may vary based on your previous experience and knowledge.

Be prepared that your career is a journey, not a destination, and learning will never stop!

Good luck!
